EOMONTH function in excel

In this article, we will discuss EOMONTH function in excel.

Purpose

This function returns the last date of the past, present and future month.

Syntax

EOMONTH ("date","no of months")

In the above syntax, we have 2 parameters

1. Date – Here, we can specify the valid date.
2. No of months – Here, we can specify the number of months. If the value is zero, then EOMONTH function will return the last date of the current month. If one, then last date of next month and so on.

Example

EOMONTH(TODAY(),0)	Equals to	30-Nov-18
EOMONTH(TODAY(),1)	Equals to	31-Dec-18
EOMONTH(TODAY(),2)	Equals to	31-Jan-19
